OVERVIEW

Professional Summary

Creative technologist and product builder with ten-plus years at Pluralsight and freelance work across AI systems, video production, hands-on labs, and practical software.

I build internal tools and AI workflows for video teams, automating busywork, enforcing quality standards, and making production faster without cutting corners. Before that I designed AI-assisted lab pipelines, wrote 60+ hands-on technical labs, and ran cross-functional production from concept to publish.

I care about strong UX, outdoor culture, and education, and I like building tools that help people tackle hard problems with more confidence.

TOOLKIT

Core Skills

PRODUCT & CREATIVE TECHNOLOGY

- Product Strategy
- Product Development
- AI Workflow Design
- UX/UI Design
- Rapid Prototyping
- Design Systems
- Information Architecture
- Systems Thinking
- Project Management
- Technical Documentation

SOFTWARE & DEVELOPMENT

- Flutter / FlutterFlow
- React / Vite
- Webflow
- FastAPI
- Supabase
- Firebase
- PostgreSQL
- Python
- Dart
- Figma
- Git / GitHub

AI & AUTOMATION

- Machine Learning
- Automation
- AI-Driven Content
- LLM Workflow Design
- MCP Integrations
- Prompt Engineering
- Agentic AI Concepts
- Preflight & QC Automation
- Structured Knowledge Systems

MEDIA & PRODUCTION

- Video Production Pipelines
- Adobe Premiere Pro / Audition
- Audio & Video Standards
- Hands-On Labs
- Technical Training Content
- Motion Graphics
- Author Coaching
- Instructional Systems

Professional Experience

Creative Technologist

Jan 2026 - Present · Remote

Pluralsight

Building internal systems and AI tooling for video teams, automating workflows, enforcing quality standards, and speeding up production.

- Design and develop internal video production tools for cross-functional teams.
- Build AI-assisted workflows and MCPs for review, QC, and delivery.
- Implement automated preflight validation for audio, video, and export standards.

Technical Content Producer

Sep 2021 - Jan 2026 · Remote

Pluralsight

Guided hands-on lab development and built AI-assisted processes for technical learning content from concept through publication.

- Led design and implementation of AI-assisted lab generation for hands-on content.
- Authored and published 60+ hands-on labs using AI while maintaining technical accuracy.
- Managed end-to-end production workflow with SMEs and authors across time zones.

Earlier Pluralsight & Digital-Tutors

2014 - 2021

Pluralsight / Digital-Tutors

Video Content Producer — Led end-to-end video production for learner-focused educational content; coached authors on tools, standards, and delivery.

Production Editor — Supported authors through course production; improved processes for faster publish times and higher author satisfaction.

QA Specialist — Maintained quality standards for course content through review, editing, and trailer production.

AV Editor — Managed video content quality on the Digital-Tutors platform; trailers, audio post, and documentation.

Freelance Designer

Jul 2017 - Present · Remote

Luke Libby Design

Build websites and applications with FlutterFlow, Flutter, Webflow, Supabase, and Firebase.

Deliver digital work that looks good and holds up in production.

BUILDS

Selected Projects

WyldTracks

FOUNDER / PRODUCT DESIGNER / FULL-STACK BUILDER

AI Wildlife Field Journal

Built a private-alpha AI wildlife field journal where users photograph animals and signs, review evidence-backed identifications checked against GBIF, and save observations to a personal journal.

- Structured AI analysis contract with candidates and field marks
- GBIF taxonomy and occurrence validation in Edge Functions

GearTraxx

FOUNDER / PRODUCT DESIGNER

Outdoor Gear Tracking Platform

Designed a consumer-focused platform for tracking outdoor gear, maintenance schedules, warranties, and usage analytics, aligned with an outdoor enthusiast mindset.

- Gear organization systems
- Maintenance tracking

CREDENTIALS

Education

Oklahoma Christian University

2014 - 2016

Bachelor of Arts, Animation & Game Design

GPA 3.6 · Dean's Award, Department of Art & Design

Northern Oklahoma College

2012 - 2014

Associate of Applied Science, Animation, Interactive Technology, Video Graphics & Special Effects

GPA 3.8 · Dean's Award

Tri County Technology Center

Certification, Architectural Drafting & CAD/CADD

GPA 3.9

Additional Strengths

- Entrepreneur mindset, builds products that help people tackle hard problems
- Outdoor enthusiast; designs tools that build confidence on new ground
- Bridges technical, creative, and production teams across remote collaboration
- Experienced public presenter, workshop facilitator, and author coach
- Native English proficiency; comfortable in startup-style and R&D environments
